ABOUT ME

I am a highly motivated and enthusiastic individual eager to learn and gain practical work experience. I am excited about developing my skills and contributing meaningfully to a team, and I am ready to embrace new challenges and opportunities for growth.

WORK EXPERIENCE

OCT 2023- Present

Ovex Technologies

Junior Software Developer

- Developed and optimized software applications with a focus on performance, scalability, and functionality.
- Designed and implemented user-friendly interfaces, ensuring a seamless user experience across various platforms.
- Built and integrated Content Management Systems (CMS) to enable efficient content updates and management.
- Collaborated with UI/UX designers and back-end developers to deliver high-quality, responsive web applications.
- Debugged, troubleshooted, and resolved technical issues to enhance application reliability and performance.

AUG-OCT 2022

Jazz

DATA MAPPING INTERN

- I was involved in a data mapping project for the MSTP and Ericsson maps with Jazz, utilizing QGIS software.

PROJECTS

Flutter

Fuel Delivery Application(FYP)

- Developed an innovative application to address emergency situations or fuel shortages.
- Enabled users to order fuel in real-time through the app.
- Provided a practical solution to a common problem.

Codeigniter

Arabian Showline

- Developed and maintained the Arabian Showline platform, an e-commerce website dedicated to selling horse-related products.
- Integrated user-friendly features to streamline browsing, product purchasing, and customer support for horse enthusiasts.

Codeigniter

Wakhla

- Developed Wakhla, an e-commerce mobile app, providing users with a seamless shopping experience for a variety of products.
- Designed and implemented a robust web admin panel, enabling easy product management, order tracking, and user management.
